

**Louise's play Fever came close to its fundraising goal in a short amount of time. Now, she wants to know how different campaigns fared in relation to their launch dates and their funding goals. Using the Kickstarter dataset that you've already combed through, you'll visualize campaign outcomes based on their launch dates and their funding goals. You'll then submit a written report based on your analysis and the visualizations you create.**

## **Project Overview**

This project aims to find out how the different kickstarter campaigns fared in relation to both their launch dates and the goals that were set for the campaign.

## **Analysis and Challenges**

This Section discusses the outcomes of the analysis carried out based on the date the fundraising was launched and the goals that were set for each of the fundraising events. The Launch date was filtered on the Parent category "theater" while the outcome based on goals was filtered on the subcategory "plays".

### **Analysis of the outcome based on the Launch Date**

The parent category theater has subcategories which include:

- plays
- musicals
- spaces

### **Analysis of the outcome based on the Goal**

This was just based on the the subcategory plays
